Further to the above, the operation of Plant 1 of the Company has commenced on 28th December 2015 and the production is being ramped up to the full levels. Production at Plant 2, which was being operated since the 2nd week of December 2015 at a lower load with the available material has also been scaled up with resumption of Propylene supplies by CPCL to both the Plants. In all Plant 1 remained shut-down for 27 days and Plant 2 for 18 days. In order to minimize the impact of the closure, actions have been taken to scale up the production to the maximum extent possible in the coming months. The Company has adequate Industrial All Risks cover including for loss of profits.
